## Laminated Solid Meranti Doors

Composed entirely of kiln-dried, premium grade Red Meranti timber, our unique doors have the dual characteristics of immense stability & durability, as well as superior appearance. Using superior German glue-bonding technology (EU-DIN "B4" standards), our laminated solids far outperforms all veneered doors in harsh weather conditions and prolonged climate exposure.

Insist on it !

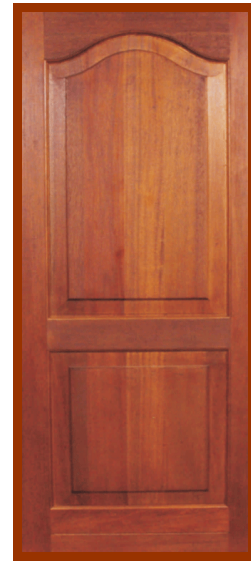

## Door Specifications

Standard doors 33" x 81". Other sizes upon request

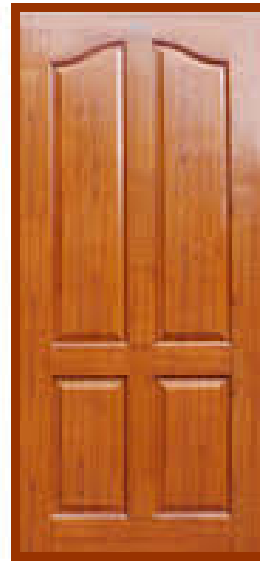

Door thickness – 32mm

Panel thickness – 18mm

Stile width – 140mm
